BOARD OF TRADE ROOMS,

CHICAGO, *January 1, 1861.*

I. Y. MUNN, Esq.,

PRESIDENT BOARD OF TRADE:

Sir:—The most pleasing duty assigned me, as Secretary, is the one of presenting to the Board at the end of the year, statistics collected for its use. That pleasure is greatly increased at this time by being able to lay before them a report showing such an astonishing increase over any former year of our traffic in property generally marketed in the Exchange Rooms.

Although the yield of grain per acre in 1859 was not large, the crop was generally good, and secured in good condition. The quantity of land tilled was large. As a consequence of this and the large crop of 1860, steady and heavy receipts have poured in upon us during the season, swelling our figures in most of the cereals beyond all precedent. It remained, however, for the favorable season of 1860 to develop what the fertile soil and genial climate of the Northwest was capable of producing. The abundant crop raised has been gathered in fine order, and "seed time and harvest" have been all that heart could desire.

Agricultural products are the acknowledged back-bone of our trade; and as a result of our last two years' crops, the general business of the country has again assumed a satisfactory condition. Those engaged in trade and agricultural pursuits have generally been enabled to clear up their old indebtedness; trade of all kinds has revived and increased, and the business aspect of Chicago and the surrounding country, was never fairer to look upon, than at present. It is true that our prosperity for the last few weeks has been checked by the derangement in monetary affairs, but it is generally thought all causes will soon be removed.

Leaving the products of the soil to show for themselves, in our comparative tables, we would refer to the products of the forest. Our receipts of lumber show a falling off from the season of 1859; but the business has been more satisfactory to dealers and manufacturers than for several years.

Our live stock and provision trade have been active with the return of a good crop of corn. Stock growers have again turned their attention largely to that branch of business.

The carrying trade has been more profitable than for many years. Our large commerce in grain has given employment to vessels at remunerative prices, and owners look back to the season's business with entire satisfaction; while the transportation by Railroads has only been limited by their capacity for carrying.

The affairs of the Board present a continued state of prosperity.

Since our last report, the Board commenced occupying their new rooms, and have received a large accession of members. A glance at the list published with this report, will show that most of our prominent business men in all branches of trade are members of the Board, thus showing the importance in which its influences are looked upon by the community. During the year, numerous measures of importance have been entertained at its meetings; among which may be mentioned the construction of the Iowa Central Railroad, between Cedar Rapids and the Missouri River; and the subject of the Reciprocity Treaty between the United States and British North America. Large sums of money have been raised for sufferers by the Great Tornado, which made such havoc to life and property, in our own State and Iowa; for the purchase of seed wheat sent the suffering farmers of Kansas, who lost their all by the long-continued drought in that region, and for many other purposes of charity. We have been visited by business men from most if not all of the principal cities in the United States, and from many in the old world,—including large delegations of merchants from our Canadian neighbors, and from the City of Philadelphia—all of whom seemed astonished at our immense and increasing trade, and the resources of the country tributary to us.

SETH CATLIN, SECRETARY

ANNUAL STATEMENT.

STATEMENT

Showing the Capacity of our Warehouses for Handling and Storing Grain.

GRAIN INSPECTION.

This important question has been under the immediate supervision of A. E. Kent, E. G. Wolcott and J. W. Finley, Esquires, who were appointed by the President, April 9th, 1860, a Committee on Inspection for the following year. On the 16th day of April, S. H. Stevens, Esq., was elected to the office of Chief Inspector, with power to appoint such assistants as were recommended by the Board of Directors. A resolution was then adopted, "that the Inspection Committee adhere to the present standard of grain inspection; but that in the case of spring wheat, discretionary power be given to Inspectors regarding the test of weight, which may be varied when it is apparent injustice would be done by adhering strictly to the standard adopted.

Up to the 15th day of May, 1860, no resolution had gone into effect requiring grain received by Canal to be inspected. On that day, a rule was adopted by the Board of Directors, requiring all grain arriving by Canal after the 17th inst., to be inspected, and fixing the fees for inspection at twenty cents per one thousand bushels. Some opposition was made to the rule when first adopted, but was soon submitted to by all receivers of grain, and the measure has given pretty general satisfaction. No change has been made in the grades of wheat, with the exception of establishing an additional grade, under the name of "Northwestern Club," to embrace all bright amber-colored spring wheat, free from dirt and other grains, and weighing not less than 59 lbs to the measured bushel. As the corn harvest approached, it was thought advisable, in consequence of the fine quality of the crop, to offer inducements to farmers and dealers to put their corn in better condition for marketing than heretofore, and to keep white and yellow corn separate, as better prices could be realized by so doing. Accordingly on the 12th day of November, all rules for the inspection of corn were repealed and new grades established, to be known as follows, viz: Pure White, Pure Yellow, Mixed, and Rejected.

The grades and requisites of the different kinds of grain as now established by the Board, are as follows:

W H E A T .

No. 1 WHITE WINTER.—The berry to be plump, well cleaned, and free from other grains.

No. 2 WHITE WINTER.—To be sound, but not clean enough for No. 1.

No. 1 RED WINTER.—The berry to be plump, well cleaned and free from other grains.

No. 2 RED WINTER.—To be sound, but not clean enough for No. 1.

REJECTED WINTER.—All unsound, unmerchantable wheat, and to weigh not less than 45 lbs. to the measured bushel.

EXTRA CLUB.—To be sound, well cleaned, and to consist of pure Club Wheat, weighing not less than 60 lbs. to the measured bushel.

NORTHWESTERN CLUB.—To be sound, well cleaned, and to comprise all kinds of bright amber-colored Spring Wheat, weighing not less than 59 lbs. to the measured bushel.

No. 1 SPRING.—The berry to be plump, well cleaned, free from other grains, and to weigh not less than 59 lbs. to the measured bushel.

No. 2 SPRING.—To be sound, but not clean enough for No. 1, and to weigh not less than 56 lbs. to the measured bushel.

REJECTED SPRING.—All unsound, unmerchantable Spring Wheat, and to weigh not less than 45 lbs. to the measured bushel.

C O R N .

PURE WHITE, PURE YELLOW, MIXED, AND REJECTED.

OATS.

- No. 1.—To be clean and sound.
No. 2.—To be sound, but too dirty for No. 1.
REJECTED.—Unsound or very dirty.

RYE.

- No. 1.—To be sound and well cleaned.
No. 2.—Too dirty for No. 1.

BARLEY.

- No. 1.—The berry to be plump, well cleaned and sound.
No. 2.—To be sound and clean.
REJECTED.—Unsound or very dirty.

NOTE.—The Inspector is instructed to use his discretion in inspecting the different grades of Wheat, and not confine himself strictly to the standard of weight where it is a manifest injury to do so.

FEES FOR INSPECTING.—Ten cents for the contents of each car. For each one thousand bushels arriving or departing by canal boats or vessels, twenty cents.

The inspection, as now conducted, is thought to give pretty general satisfaction. The present Committee, profiting from the experience of former Committees, have made many improvements. The Board have assumed all the responsibility attending it, by collecting the fees for inspection and paying the salaries of Inspectors. They require bonds from the Inspectors for the faithful and competent discharge of their duties; and make them responsible for erroneous inspection. They have caused new books to be provided, and a record kept of all grain inspected.

We give below a statement of grain inspected from the year's receipts, and hope in future to be able to give the inspection of all grain which arrives.

EXPLANATION.

As no reliable figures can be obtained of the monthly business of our railroads until about the 20th of the following months, and as it was thought desirable by the President and Directors to present the Annual Report of the Board at an earlier date than heretofore, they gave instructions in compiling the figures to collect the property received and forwarded from December 1, 1859 to December 1, 1860, instead of waiting to get correct figures for December, 1860. This will make our report more reliable than to have estimated the month of December for the present year as must have been done to have brought out the statement at as early a date, and will perhaps give more satisfaction to those interested although the figures presented will show much smaller than they would had the contrary course been adopted. Our packing business, weekly quotations, and in fact, everything connected with the report except what has already been stated, show for the full year of 1860.

The two following tables gives the whole movement of flour and grain for the present and a series of years.

FLOUR.

The increase in our flour trade over the year 1859 is shown to have been 57,527 barrels.

The figures in all probability would have been much larger but for the dry weather which prevailed for many months, leaving the streams too low to run mills dependent on water power.

The demand for flour sent here to find a market, as well as that manufactured in the city has met with the usual demand from the Eastern States, while a new feature in the trade is presented by large shipments over the Illinois Central, and Chicago, Alton & St. Louis railroads to fill orders for the Southern trade.

The facts given in the following tables, which show a large and steady yearly increase, will warrant the assertion that the time is not far distant when Chicago will be the largest primary market for flour on the face of the globe. Our weekly table presents a range of prices which shows that flour of all qualities, from that manufactured from the poorest Spring to the best Winter Wheat, can be found in this market.

WHEAT.

By reference to the tables which follow it will be seen that our trade has been larger by 3,872,322 bushels than in any previous year.

Of the 14,427,083 bushels received, 2,360,729 bushels belonged to the crop of 1859, and 12,066,354 bushels to the crop of 1860. This shows the quantity already received from the crop of 1860, 1,481,593 bushels more than during the year 1857, which were the largest receipts recorded for any one year previous to the present; while the yield and quality has been very satisfactory. Prices, as will be seen by our weekly table, have been remunerative to the producer and the business has been done with pretty general satisfaction to dealers. The amount to come forward is variously estimated at from one-fourth to one-half the crop. We think at least one-third is yet left to seek a market. The prospect now is that it will all be wanted at good prices for the Southern and Foreign markets.

The following table shows the quantity received and forwarded for seven years.

CORN.

Our receipts for the year foot up 15,262,394 bushels against 5,401,870 bushels in 1859.

The receipts in Chicago from the crop of 1859 is shown to have been 15,602,180 bushels. It was of excellent quality and larger by 3,880,299 bushels than has ever sought a market here from one crop. By referring to our table of receipts and shipments it will be seen that notwithstanding the large amount marketed, the crop of 1859 was only sectional, our receipts being confined mainly to railroads running South and Southwest, while shipments of some magnitude were made by roads running North and Northwest, to supply a section of country where the crop was a failure.

The crop of 1860 was more general and extended throughout the entire Northwest. But a small portion of it has come forward—say 772,293 bushels. That it is much the largest ever raised in the Northwest is certain. That the quality never was better is equally certain. No one can estimate the amount to be marketed here with any degree of accuracy, so much depends upon prices east, and rates of transportation.

The following table shows receipts at Chicago from the last six crops.

TABLE

OATS.

From information gathered this crop was unusually large. Sufficient were left over from the crop of 1859 to supply the trade until harvest, since which time freights have ruled too high to allow shipment east with profit. A good demand however has existed for the Southern trade, and about 250,000 bushels have been sent south by canal and railroad. The season closes with a large stock in store, say, 415,807 bushels. The following table shows receipts and shipments for six years.

RYE.

The season opened with a small stock on hand. Prices ranged from 72 to 92 cents, until about the first of June, when the stock became exhausted. Like all other grains the present crop was a large one. The market opened in August at 50 to 52 cents, and prices remained steady with a slight decline, until the end of the year, closing at 45½@46 cents.

The stock on hand January 1, 1861, was 72,283 bushels.
The following table shows receipts and shipments for seven years.

BARLEY.

Our receipts for the year foot up 636,244 bushels.
The crop of 1860 was perhaps as large as in 1859, but of far less value, a large proportion having been injured during the harvesting. The year closes with a stock in store of 70,473 bushels.
The following table shows receipts and shipments for last seven years.

HOGS.

Our receipts of Hogs for the year foot up 392,864 against 271,204 in 1859. The shipments have been 227,164 against 110,246 in 1859. Of the number received 285,149 were live hogs, 191,931 of which have been shipped to eastern markets.

The trade as been active throughout the year, and good rates have been maintained as a glance at our weekly table of prices will show. The market declined slightly towards the close of the season, under the pressure of large receipts.

CATTLE.

Our receipts of Cattle foot up 177,101 head, against 97,474 head in 1859. The receipts by almost every road entering the city show an increase over any former year. The increase by the Chicago, Burlington & Quincy Railroad, amounts to 48,943 head.

Our shipments have amounted to 100,404 head, which shows a very active trade. We believe the business has been quite satisfactory to those engaged in it.

We will only add that Chicago maintains her pre-eminence in the trade.

The following table shows the price of Beef Cattle weekly throughout the year.

BEEF AND PORK PACKING.

We give below a description of our packing houses and facilities for packing, collected with great care by W. H. Roloson, Esq., a prominent provision dealer in our city:

CHICAGO, ILLINOIS, October 28th, 1860.

MESSRS. R. M. & O. S. HOUGH—Have a packing house (brick) situated on the South Branch, Chicago River; it is 150 feet long by 86 feet broad, with a cellar 60 by 150 feet. The House, Cooper Shop, Sheds, etc., etc., cover about three and one-half acres of ground; there is 800 feet dock front, where Propellers of the largest class can load and unload; also a railroad track runs through the establishment, by which 1,000 barrels a day can be loaded; they can handle 200 head of Cattle and 1,000 Hogs per day; they have two tanks and four kettles, and can render 100 barrels Lard daily; they employ 100 hands in their Packing House, and 30 in their Cooper Shop; the number of barrels packed in the season is 35,000. O. S. Hough attends to the in-door business, and R. M. to the outside transactions.

The house of **JOHN G. LAW & Co.** is two stories high, 60 feet by 120 feet, the lower story is used for killing Cattle, the upper for killing Hogs,—both carried on at same time; can kill 230 head Cattle and 800 Hogs, and pack same, per day; the building for kettle and steam rendering is 40 feet by 60 feet, also two stories high, capacity for rendering Tallow and Lard equal to the killing. Ham house 30 feet by 80 feet, with 26 vats; can cure 26,000 Hams at one time; is also used for leeching Tierce Beef; yard room for 400 head Cattle and 1,500 Hogs.

BOWERS & Co.'s house is built of brick, is 100 feet by 120 feet, has four rendering tanks, and is of capacity to slaughter and cut 150 Beeves and 1,000 Hogs daily, and has every necessary appurtenance for a first-class Provision Packing House; it is on the Michigan Southern Railroad track, and contiguous to the several Stock Yards.

G. S. HUBBARD & Co.'s Packing House, operated by **SAMUEL HOLMES & SON**—Main building 80 feet by 160 feet, three stories high (brick); rendering house 60 feet by 100 feet, three stories high (brick); Warehouse 50 feet by 100 feet, two stories high,—Stable, Scale House, large Smoke House, etc., occupying 200 feet River front, and 1,500 feet depth, planked, and having everything required by a first-class Packing House.

CREGEN & Co.'s house is 214 feet front by 110 feet deep; can kill 4,000 Hogs and 400 Cattle daily; employs 140 hands, and 61 hands in the Cooper Shop; the Cooper Shop is 280 feet long by 30 feet wide; the House, Shop, etc., occupying four and one-half acres ground. Mr. John L. Hancock, one of the firm, attends to all the in-door business. This firm expended from fifteen to sixteen hundred thousand dollars a year on Hogs, etc. They packed, cut, etc., last year 20,079 head Cattle, and 24,565 Hogs,—the House, etc., was then only one-half the size it is now. The number of packages shipped by them last season was 61,000.

JONES & COLBERTSON's House is 100 feet square, and their killing house 100 feet by 60 feet; they employ 100 hands, and kill and pack 1,500 Hogs and 300 Beeves per day. Last season they killed, etc., 15,000 Hogs,—this year they will pack double that number.

TOBEY & BOOTH's House is 100 feet by 250 feet; they employ 60 hands; they also can cure meat in mid-summer, with the Thermometer at 100 degrees, by means of their Ice Houses, in fifteen days; they can with ease, kill and pack 800 Hogs per day, and many more, if necessarily required to do so.

HARBECK & KREIGH'S House is 225 feet river front, 450 feet long and 120 feet wide; can kill 2,000 Hogs and 300 head Cattle daily; can load vessels of the largest tonnage from the dock. The pens for stock, etc., etc., occupy about three acres ground.

JOHN HAYWARD'S House is 50 feet by 120 feet; can kill and pack 700 Hogs and 150 head Cattle per day; has a force of 50 hands. Lot occupies two acres.

THOMAS NASH has two packing houses and one slaughter house, they occupy two and one-half acres ground. He uses them chiefly for singeing and curing meat for English markets.

FLINT & STEARNS' House is 100 feet square. Last year they packed 10,500 hogs, and this year intend to double that number, if the prices and markets justify it.

The number of Hogs packed in Chicago during the year was 160,082. The number packed for the season of 1859-60, was 159,339. There has already been cut for the season of 1860-61, 124,798 Hogs, which would indicate that more will be cut during the present packing season than any former one. The number is estimated from 190,000 to 200,000.

In Beef packing, our exhibit shows a falling off—not that the quality of our Beef has diminished in reputation, but that the business for the past two years has been overdone. The number of Cattle slaughtered by packers in 1860 was 34,623, against 51,606 in 1859.

PROVISIONS.

The following table of Receipts and Shipments of the principal products of Hogs and Cattle is given for what it is worth. The manner of classifying by Railroads and entering in Custom House books, renders it impossible to give an intelligible account of this branch of trade.

TABLE Showing Receipts and Shipments of most of the Products of Hogs and Cattle in 1860.

LUMBER.

This trade for some years has proved unprofitable to manufacturers and dealers. The rapid growth of the Northwest and consequent demand for building material, stimulated capitalists to embark largely in the trade, from 1850 to 1856. The panic in monetary affairs in 1857, the short crop in 1858 and low water in the Illinois River, made the business a disastrous one. Sales were made at a sacrifice from the commencement of the year 1857 until the approach of the last harvest. Since that time the business has been satisfactory to all those engaged in it. Notwithstanding the small amount forwarded by canal in consequence of low water, the season closed with a comparative small stock on hand.

The trade for December has been quiet, but the stock is held firmly at quotations, and it is thought everything saleable will be wanted before the opening of Lake navigation.

Lumbermen are looking for a good trade in 1861.

The following table shows our stock of Lumber, Lath and Shingles for 1860, and its disposition:

T A B L E

Showing the quantity of Lumber, Shingles and Lath, Received and Forwarded during the year, with sources of Supply, and Disposition.

SALT.

The following tables show our receipts and shipments of Salt the past year, and for a series of years. One marked feature has characterized the trade in 1860, the consolidating of the business in Syracuse salt, and uniformity of prices in that article. In consequence of discoveries of valuable salt springs in Michigan, our course of trade in salt will undoubtedly be changed when the necessary preparations are made for manufacturing.

TABLE Showing the quantity of Salt Received and Forwarded during the year 1860.

HIDES.

The importance of Chicago as a Hide market is too well known to need comment. The usual activity has been manifested the past year. Prices, however, have ranged lower than in 1859, but in consequence of the accumulation of a large stock that year there has been less speculation.

The following tables show the extent of our trade in this article the last two years, and weekly prices for the year just closed.

HIGHWINES.

Our trade in this article, in 1860, reached 124,526 barrels. Of this quantity about one-half has been manufactured in the city. Our foreign trade has amounted to 59,303 barrels, the balance has been consumed in the city and remains on hand. Prices have been low and steady, commencing the year at 21@21½ cents, and selling, at the close, at 14½@15 cents. It is thought the year's business has been fairly remunerative to Distillers.

OUR JOBBING TRADE.

Our advantages as a commercial city are equal if not superior to any inland city on the continent.

We have been at considerable pains to ascertain the extent of our Jobbing Trade in 1860, and present the following as the result of our investigations:

In Dry Goods.....	\$15,000,000
In Groceries (including Sugar Refinery).....	8,200,000
In Iron and Hardware.....	3,650,000
In Boots, Shoes, Clothing, and other goods (estimated).....	5,000,000
Amounting to.....	\$31,850,000

RATES OF TRANSPORTATION.

The following tables show rates of Freight by the different lake routes, also the railroad tariff for 1860. It will be seen that freights by lake ruled low until after harvest. Since harvest the immense amount of grain and other products from the new crop being moved, caused freights to advance, and higher prices have been realized the remainder of the season than at any time since 1856. The business for the season has been very satisfactory to vessel owners.

MARINE.

The tonnage of American vessels engaged in the commerce of the lakes, shows less than in 1858. During that year and the year 1859 vessels with an aggregate of nearly 20,000 tons sought the ocean trade, in consequence of a scarcity of freights on the lakes. Since our last harvest most of these vessels have returned. It is thought, however, that vessels of an equal amount of tonnage have gone out of commission the past year, in consequence of accidents and other causes.

TABLE Showing the Tonnage and valuation of vessels (American and Canadian bottoms,) engaged in the Commerce of the Lakes the last three years.

IMPORTS AND EXPORTS.

We present the following valuation of property which has arrived at and departed from our city, with a great deal of reluctance. It has been compiled at the request of many of our business men interested in such statistics. The best judges in such matters pronounce our estimates low. An examination of the statement of articles received and forwarded which precedes this, will show the difficulty of placing a correct estimate upon the value of a large amount of miscellaneous property received and forwarded. *`

The table has been prepared with great care, under the supervision of J. J. Richards, Esq. In valuing the articles enumerated, the receipts and shipments for each month are valued at the average prices during the month;—this has been a work requiring much labor but ensures its correctness.

The value of our Imports and Exports in 1858, as reported to the United States Government by Col. Graham, was \$174,896,011.70. We see no reason why the figures presented herewith should fall short of that year, unless Mr. Richards places a lower valuation on property where the value cannot be correctly ascertained, than was fixed by Col. Graham; our Commerce in the products of the soil as well as in most other articles of trade in 1860 having greatly exceeded that of 1858.

VALUATION

Of Property Received and Forwarded, by Lake, Canal and Railroads, in 1860.
